

## World Geography

Developed by teachers **World Geography** introduces students to the main physical and political features of world geography. The program teaches the world's hemispheres, continents, oceans, countries and capitals, which are presented in 5 units and 240 activities. Helpful clues and examples, along with exciting audio-visual content, ensure that students of all learning styles can use the software on their own. Students choose units that interest them most, enhancing motivation to learn and providing a sense of independence. **World Geography** is an effective and engaging way to introduce young minds to the world's principal physical and political borders.

## Targeted Skills

- World Hemispheres
- World Continents
- World Oceans
- World Countries
- World Capitals

## Teacher Dashboard

The Teacher Dashboard tracks student progress throughout each program and records the percentage score for every activity completed. This feature provides an overview of how well a student is progressing and allows the teacher to identify strengths and weaknesses.

- Records students' results automatically as they work.
- Prints reports quickly and easily for sharing with parents and staff.
- Provides summary reports by subject or detailed reports by activity.
- Allows teachers to print reports for individual students or an entire class.
- Stores student marks in one central location for all programs.

## **Program Outline**

The program is broken down into 5 main units, which can all be accessed from the main menu. On the following pages, each of these different units are broken down. The main menu units are:

1. Hemispheres - 5 activities
